our community

Montgomery County is **81st out of 88** Ohio counties in health outcomes.

26 percent of the county's children live in poverty.

50 percent of kids in our region, age 0-11 years are overweight/obese.

Montgomery County infant mortality rate is **6.8 per 1,000** infants. Ohio ranks 43rd in the nation. (prelim)

Only **34%** of students demonstrate readiness for kindergarten.

Over 25,000 children (more than one in five) experience food insecurity in Montgomery County

child health pavilion

transformation of care

- Expanding Dayton Children's Pediatrics
- Integrated and co-located social risk assessment and resource connection for all families
- Developed programs for children in foster/kinship care, children with medical complexities, children with unhealthy lifestyles
- Launched a team of community health workers to support family needs
- Opened a teaching kitchen to the community

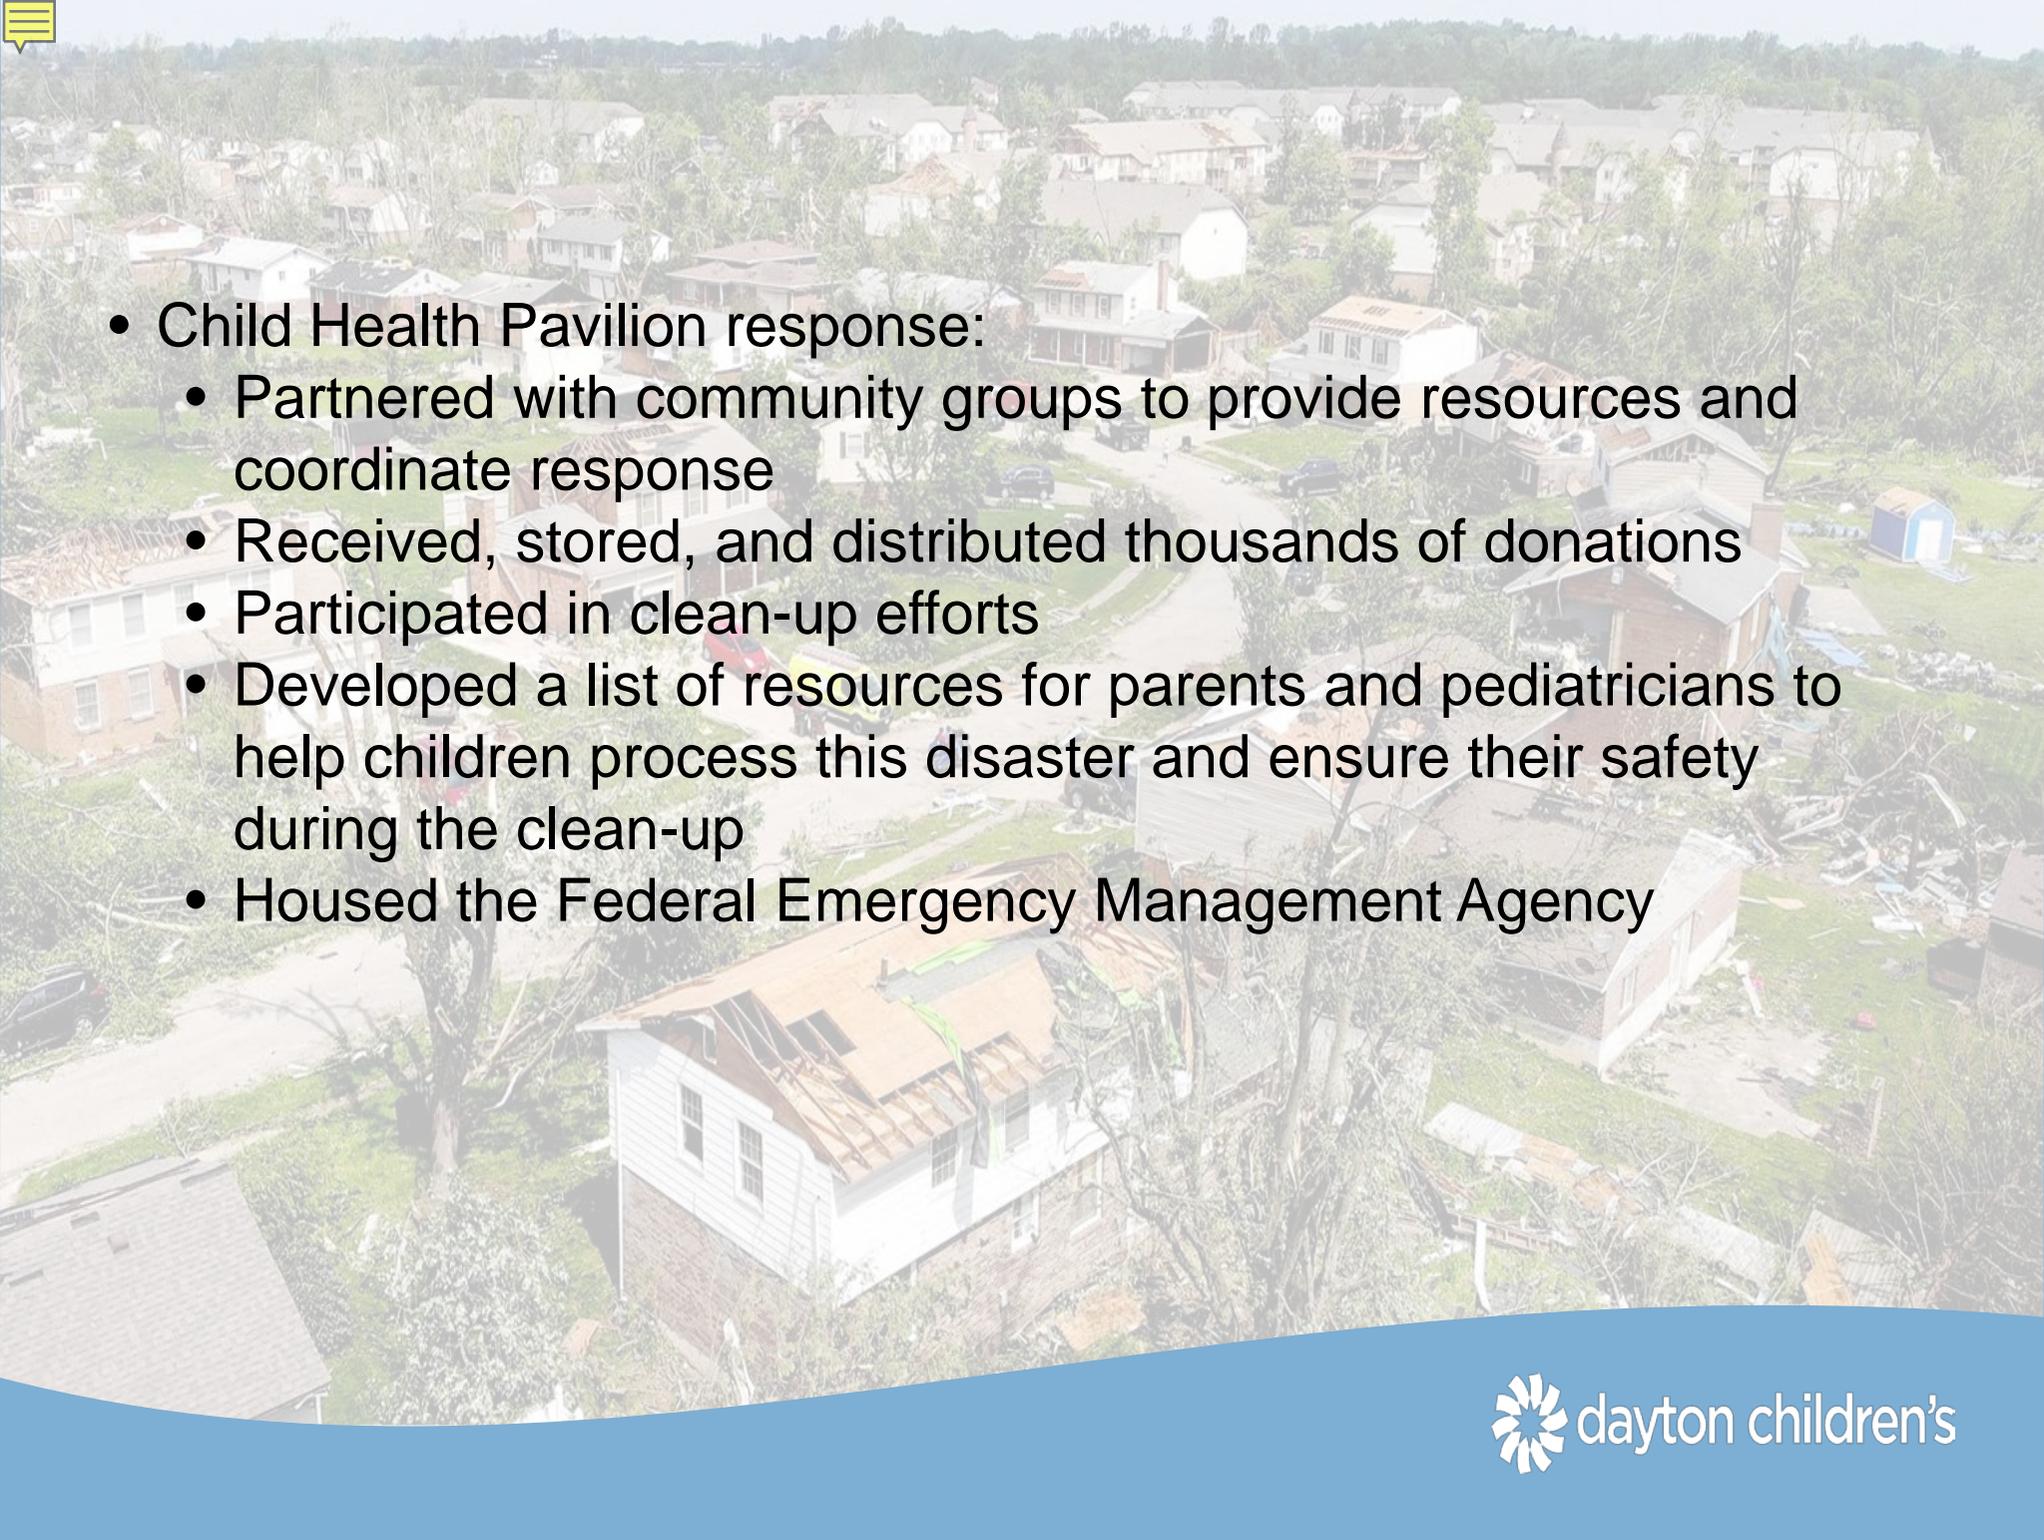

community kitchen/ food pharm utilization

- Nearly 1000 boxes of food distributed
- 587 families served
- 2466 people impacted

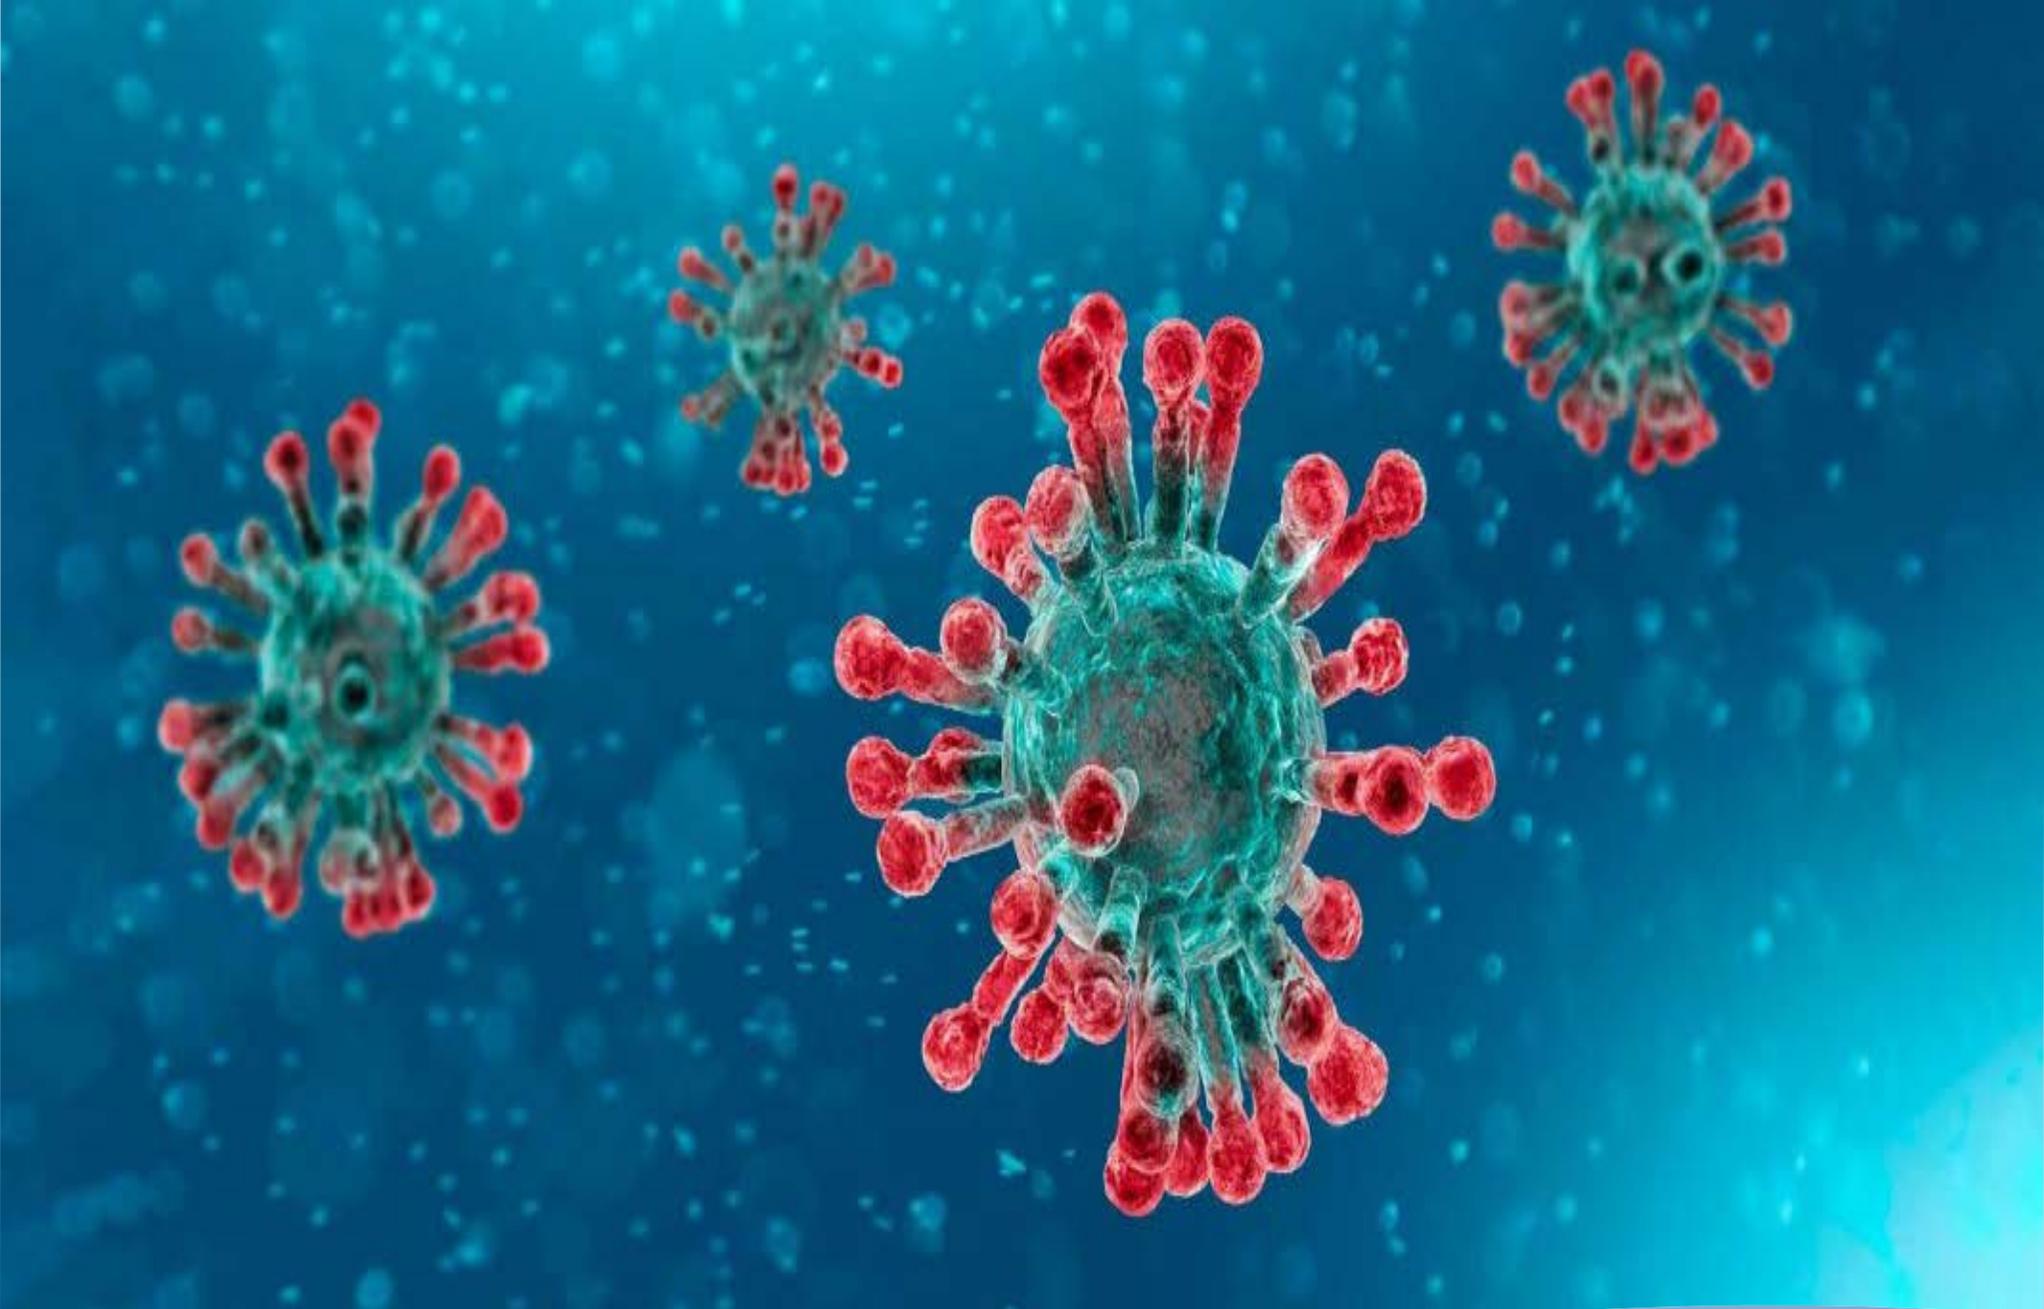

- 1054 people participated in food classes

- 
- Child Health Pavilion response:
 - Partnered with community groups to provide resources and coordinate response
 - Received, stored, and distributed thousands of donations
 - Participated in clean-up efforts
 - Developed a list of resources for parents and pediatricians to help children process this disaster and ensure their safety during the clean-up
 - Housed the Federal Emergency Management Agency

- Child Health Pavilion response:
 - Prepared editorials and blog statements on firearms and child safety
 - Partnered with Ohio AAP on the Store it Safe! Initiative to distribute lockboxes
 - Integrated a firearms safety question into routine clinical care with plans to conduct research

- Child Health Pavilion response:
 - Addressing increased food insecurity needs of the neighborhood
 - Deployed telehealth and video visits so that children could receive medical care from the safety of their home
 - Informed local and state government officials on impact of COVID-19 on children's health, the child welfare system, and the community as a whole
 - Continuing to find ways to connect with our community

a look ahead

- Integrated behavioral health services at pavilion
- Taking health care out of the building and into the home and school
- Developing a research/data infrastructure to “tell our story”
- Utilizing primary care / community collaboratives to identify outcomes-based strategies related to:
 - Preventative care
 - Behavioral health
 - Violence reduction
 - Healthier lifestyles
 - Educational success
